ATTENTION

THIS CHART CONTAINS OFF ROUTE OBSTRUCTION CLEARANCE ALTITUDES (CROCA). The off route obstruction clearance altitudes shown in quadrangles bounded by dashed lines and latitude and longitude are represented in THOUSANDS and HUNDREDS of feet above mean sea level. The CROCA is based on information concerning the highest known features in each quadrangle, including peaks and obstructions. CROCA provides obstruction clearance with a 1000 foot buffer in designated non-mountainous areas and a 2000 foot buffer in designated mountainous areas within the United States. For areas in Mexico and the Caribbean which are located outside of the U.S. ADOZ, CROCA provides obstruction clearance with a 1000 foot buffer. This chart is provided for information clearance only. It does not provide for NAVD83 signal coverage or communication coverage, and would not be consistent with altitudes assigned by Air Traffic Control.
